WiFi connection help

First, how to identify even the WiFi is 5G or 2.4G?

Turn on your phone and enter the settings page. Click on the currently connected WiFi to enter the details page to view the frequency information of the currently connected WiFi

Second, how to set 2.4GWiFi from the router?

1. Check the back of the router and use the web page to log in to the router settings website;
2. Click the wireless setting, go in to set the WiFi signal in 2.4G and 5G frequency band respectively.
